EMPOWERING THE JOURNEYS OF MANY

At L B Finance PLC, we believe that no journey can be undertaken alone. Over the years, even as we made new strides in the industry and achieved unmatched progress, we continued to value and nurture the partnerships we made along the way; driving the collective development of the individuals and communities that surrounded us, through a spirit of collaboration that ensured mutual growth.

Today, as we venture into the future, we reinforce our pledge to strengthen and prioritise the needs of the many stakeholders that have contributed towards our success story. We are focused on inspiring every individual who partners with us to embark on a path filled with infinite possibilities. We are doing far more than simply advancing steadily towards our goals. We are also enabling the countless lives we impact to experience the life they envision for themselves; assisting them to achieve their aspirations both now, and in the years ahead.

Read on, and discover how L B Finance is built on a foundation designed to empower the journeys of many.

STATEMENT FROM OUR MANAGING DIRECTOR

GRI 102 – 14

Mr. Sumith Adhietty

Managing Director

CHALLENGES AND OPPORTUNITIES

The Sri Lankan economy appeared to regain some momentum in 2021, bouncing back strongly after two years of weak growth. Rapid progress in the government-led vaccination campaign helped to bring the COVID-19 pandemic under control which paved the way for the broad-based resumption in economic activity to enable the broad-based recovery across all key sectors. Figures published by the CBSL indicate 3.7% GDP expansion - the result of higher domestic consumption and a strong contribution from the export sector. All other sectors too appeared to recover well to record satisfactory growth in 2021.

The SME sector showed a mixed response towards resumption of economic activity, for the most part mirroring the broader economic environment. While manufacturing and trading SMEs staged a quick comeback, those in tourism and transport were slower to revive as underlying conditions remained weak. However, on the back of rising inflation, the US Dollar liquidity crisis in the Country and the Rupee devaluation in early 2022, the prospects of the SME sector as a whole was once again pushed into uncertain territory.

Strong early progress made by the SME sector in 2021 translated into good growth for the NBF sector, which has long been the mainstay of SME sector growth in Sri Lanka. The NBF sector strengthened significantly in 2021. Fueled by consistent credit expansion throughout the year, sector asset expansion reached a solid 6.1%, which was a sharp contrast to the contraction experienced in 2020. Overall economic revival and improved business conditions were also reflected in lower NPLs, signaling a drastic improvement in sector-wide credit risk.

LBF'S STRATEGIC RELEVANCE

A leading Financial institution

As a leading financial services provider, we play an important role in the economic life of individuals and businesses all around Sri Lanka. We help create, grow and protect wealth and thereby contribute towards shaping the future prospects of our Country and its people. Towards this end, it is essential that our business model remains agile and highly responsive.

Framed by the foundational principles of credit and lending, our business model has continued to grow and evolve through a process of managed evolution. It is how we ensure that LBF always has the capacity to dynamically reorient to market conditions. This past year provided the opportunity to mobilise yet another managed evolution of our business model, this time to leverage the robust credit appetite in the post-pandemic scenario.

We focused on multiple strategies combining both market penetration and market development approaches to record double-digit growth across all our major portfolios. Our auto finance portfolio reported healthy 14.45% year on year growth, while our gold loan portfolio expanded by an impressive 26.22% over the previous year. The collective increase in our lending activities saw LBF's asset base cross the Rs. 164.36 Bn mark, denoting the highest asset base among NBFs in financial 2021/22.

The growth in our asset base was complemented by stringent yield management to bolster our NIMs. We also

tightened recoveries with the intention of driving a sizable reduction in NPLs. I am pleased to note that we were successful on both accounts which in turn augmented our bottom line and further reinforced our balance sheet.

 2021/22 Integrated Annual Report, Managing Director's review, page 36

GRI 101

FOUNDATION

We have taken into account all requirements and guidelines from GRI 101: Foundation in the preparation of our sustainability report, especially GRI's reporting principles for defining report content and quality.

Reporting principles for defining report content

- ④ Stakeholder management
- ④ Sustainability focus
- ④ Materiality
- ④ Strategic direction
- ④ Completeness

Reporting principles for defining report quality

- ④ Accuracy
- ④ Transparency
- ④ Accountability
- ④ Comparability
- ④ Reliability
- ④ Timeliness

2. STRATEGY

GRI 102 – 14

Statement from senior decision maker

At LBF, we are committed to acting sustainably in our everyday business activities, for we believe that sustainability presents an opportunity to use our skills, expertise and relationships to make a positive difference on individuals, society and the environment. Underpinned by our sustainability strategy, we have set a number of commitment to anchor sustainability more deeply into our operations and to increase our vigilance of sustainability issues over time.

 2021/22 Integrated Annual Report, Managing Director's review, page 36

GRI 102 – 15

Key impacts, risks and opportunities

Global megatrends express societal shifts and rapidly changing customer behaviours. Overall, we are seeing a growing customer base living longer and more environmentally responsible lives in an increasingly interconnected world. Risk is inherent in all business activities of a financial institution engaged in a varied offering of financial services. Sound risk

management enables us to protect our depositors and investors whilst delivering an adequate risk adjusted return to our shareholders. At LBF, we believe in aligning corporate strategy closely with risk strategy. Risk management efforts are aimed at risk steering, as opposed to mere risk prevention, minimization or identify the potential opportunities.

 2021/22 Integrated Annual Report, our operating context, page 50

3. ETHICS AND INTEGRITY

GRI 102 – 16, 102 – 17

Values, principles, standards and norms of behavior

Mechanism for advice and concerns about ethics

LBF has built its good reputation and brand name over a long and rich history. To preserve it, we are committed to adhering to the highest ethical standards in our interactions with all stakeholders – customers, business partners, shareholders, employees, government institutions and the communities in which we operate. Being open, transparent and honest in dealing with these stakeholders allow us to grow responsibly and share our success.

All employees should comply with Financial Customer Protection Framework, Finance Business Act Directions No. 01 of 2018 dated 16th January 2018, issued by the Central Bank of Sri Lanka, and should undertake to comply with the guidelines as stated therein discharging their duties and responsibilities.

Dedicated HR Officer oversees and monitoring the ethics and integrity of the Company and Compliance Officer conduct the training and administration as part of the ethics and integrity on behalf of the Company.

Every employee should sign the declaration of the Code of Conduct and agree with at all times act in conformity with all the provisions in the Code of Conduct and it publish in English language.

Code of Conduct: Ethical and lawful behavior and organizational integrity

Developed by	Approved by	Monitored by
HR department	Board of Directors	HR department and Compliance department

The Company should proactively promote ethical behaviour and encourage employees to talk to supervisors, managers or other appropriate personnel when in doubt about the best course of action in a particular situation. Additionally, employees should report violations of laws, rules and regulations or the Code of Business Conduct and Ethics to appropriate personnel. To encourage employees to report such violations, the Company must ensure that employees know that the Company will not allow retaliation for reports made in good faith.

GRI 102 GENERAL DISCLOSURES

4. GOVERNANCE

GRI 102 – 18

Governance structure

The Board of Directors is the highest governing body. Management Committees responsible for decision-making on economic, environmental, and social topics [Committees of the governing body are: Audit Committee (AC), Integrated Risk Management Committee (IRMC), Nomination Committee (NC), Remuneration Committee (RC), Related Party Transaction Review Committee (RPTRC) and Sustainability Committee].

 2021/22 Integrated Annual Report, governance structure, page 228

GRI 102 – 19

Delegating authority

The delegation of authority for economic, environmental and social topics related to Sustainability Committee has been formalised in the CSR and sustainability guidelines.

GRI 102 – 20

Executive level responsibility for economic, environmental and social topics

There is a dedicated Assistant Manager to take the responsibility for economic, environmental and social topics of the Company and directly reported to the Managing Director, Executive Director- Asset Finance and Executive Director- Asset Management.

GRI 102 – 21

Consulting stakeholders on economic, environmental and social topics

Consulting stakeholders for economic, environmental and social topics going through sustainability governance framework has been formalised in CSR and sustainability guidelines.

GRI 102 – 22

Composition of the highest governance body and its committees

 2021/22 Integrated Annual Report, Board profiles, page 42

GRI 102 – 23

Chair of the highest governance body

No, the Chairman is Non-Executive.

GRI 102 – 24

Nomination and selecting the highest governance body

In the process of nomination Directors, the Board independently and the Nomination Committee, evaluate the balance of skills, knowledge and experience on the Board and selects candidates who would complement the make-up of the Board. When doing so the skillset, experience, knowledge, diversity and availability on economic, environmental and social topics of the candidate are taken into consideration. Further, whether the candidate is independent in character and judgment and whether there are relationships or circumstances which are likely to affect, or could appear to affect, his/her judgment is also considered. Directors appointed to the Board are required to retire and submit themselves for re-election by the shareholders at the Annual General Meeting of shareholders immediately succeeding his/her appointment.

GRI 102 – 25

Conflict of interest

All Directors are guided by the provisions of the Conflict of Interest Policy. Where Directors have an interest in a material transaction or matter involving the Company that is being considered at the Board or a Board Sub Committee level, they: disclose interest as a general requirement, excuse themselves from the meeting during Board or Board Sub Committee discussions do not cast a vote on the matter related party disclosures.

The Related Party Transaction Review Committee reviews non-recurrent related party and interested person transactions and keeps the Board informed of such transactions, if any.

GRI 102 – 26	Setting purpose, values and strategy reviewed and recommended by the Integrated Risk Management Committee and approved by the Board. Board approved strategic objectives and corporate values has been derived from the Company's Vision and Mission and it has been communicated throughout the Company. Respective functional Heads/ business Heads review and update strategies, policies and goals for submission to the Board through the responsible Executive Directors.
Role of highest governance body in setting purpose, values and strategy	
GRI 102 – 27	Board having the optimal mix of skills, expertise and experience, is paramount to ensure that the Board as a collective is equipped to guide the business and strategy of the Company. To enhance and develop the collective knowledge, Board is briefed on such matters to the management at the committee meetings. Then an expert independent consultant or internal expert conducted a specialised refresher on sustainability topics to the Board of Directors.
Collective knowledge of highest governance body	
GRI 102 – 28	A performance self-evaluation is carried out internally on a periodic basis. A self-evaluation is conducted within Group Sustainability updates to the Board. The evaluation covers performance on key economic, environmental and social topics of priority at all levels of the Company.
Evaluating the highest governance body's performance	None of these actions taken in response to evaluation of the highest governance body's performance with respect to governance of economic, environmental and social topics.
GRI 102 – 29	The identification of the risks will be carried out by the Integrated Risk Management Committee team on behalf of the Board, in consultation with the relevant business owners. The Board Audit Committee is responsible for identification and resolving of queries on governance. Identification, monitoring and controlling the due diligence aspects.
Identifying and managing economic, environmental and social impacts	Assess, validate, report and review the sustainability aspects with compliance and due diligence;
	<ul style="list-style-type: none"> » Monthly » Quarterly » Annually and submitting a report to the Board of Directors and stakeholder consultation is an integral part of the IRMC process within LBF.
GRI 102 – 30	The Group's risk management framework is reviewed by the Board Integrated Risk Management Committee.
Effective of risk management process	
GRI 102 – 31	On a quarterly basis
Review of economic, environmental and social topics	
GRI 102 – 32	Managing Director
Highest governance body's role in sustainability reporting	
GRI 102 – 33	If there is/are critical concern/s, management will communicate the same to the Board of Directors for their discussion and Board will provide narrations and direction to solve or mitigate the concern/s.
Communicating critical concerns	
GRI 102 – 34	Concerns are considered 'critical' when existing internal controls are inadequate to appropriately address them. Concerns taken up for discussion with the Board in 2021/22, none were deemed as 'critical'.
Nature and total number of critical concerns

REGULAORS

GRI 102 – 41

Collective bargaining agreements

While respecting the universal principles and norms that protect human rights in employment, as specific in the UN Global Compact (UNGC) and in the declarations of the International Labor Organisation (ILO), including the employee right to the freedom of association and the right to engage in collective bargaining, LBF's strong relationships with employees has meant there is no need for any collective agreement. During the year under review, the Company has not faced any type of industrial disputes.

GRI 102 - 42, 102 - 43, 102 - 44

Identifying and selecting stakeholders

Approach to stakeholder engagement

Key topics and concerns raised

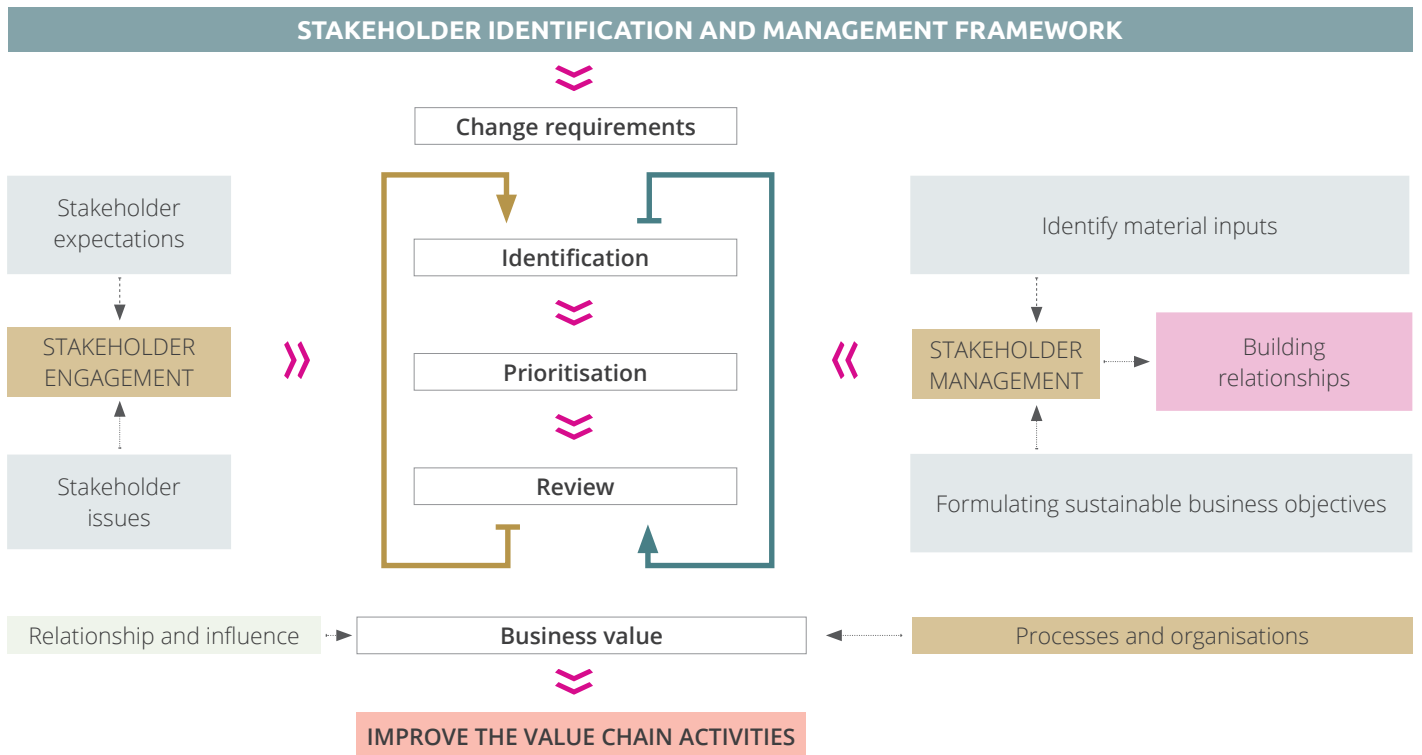

Stakeholder identification is the first and second steps respectively in our integrated stakeholder management framework. We follow two-pronged approach to identify LBNF's stakeholders and broadly classify them under the economic, social or environmental dimensions;

- » Impact-based - Stakeholders who have the ability to directly influence the Company's economic, social or environmental performance.
- » Interest-based - Stakeholders who may not have a direct influence over our business activities but have an interest on our economic performance and the progress we are making as a corporate steward.

Stakeholder relationships

Being a financial services organisation, our business depends largely on relationships with customers, employees, shareholders, business partners, society/communities and regulators etc. Everyday, across our business we encounter stakeholders who determine our ability to create and sustain long term value. It is therefore, imperative that we connect with them and remain connected with all our stakeholders. We follow an Integrated Stakeholder Management Framework in order to build strong and rewarding relationships with our stakeholders which we expect will pave the way to achieve LBF's vision.

Stakeholder engagement framework

GRI 102 GENERAL DISCLOSURES

Engagement

Once stakeholders are clubbed into either one of the above categories, they are then prioritized according to the degree of engagement required to sustain good relations.

Review

Taking cognizance of the dynamic environment which we operate in, the stakeholder identification process is revisited every five years to identify the emergence of any new stakeholders.

Using the below matrix as a base, we then measure the quality of the existing relationship and determine the scope and scale of engagement required. Working within these parameters we are then able to deploy the most appropriate methodologies to engage with different stakeholder groups.

STAKEHOLDER POWER	Keep satisfied – Meet needs » Regulators	Keep engaged – Manage closely » Customers » Investors » Employees
	Monitor lightly	Keep informed – Respect interest » Business partners » Community
	STAKEHOLDER INTEREST

GRI 102 - 45

Entities included in the consolidated financial statements

 2021/22 Integrated Annual Report, financial statements, page 304

GRI 102 - 46, 102 - 50

Defining report content and topic boundaries

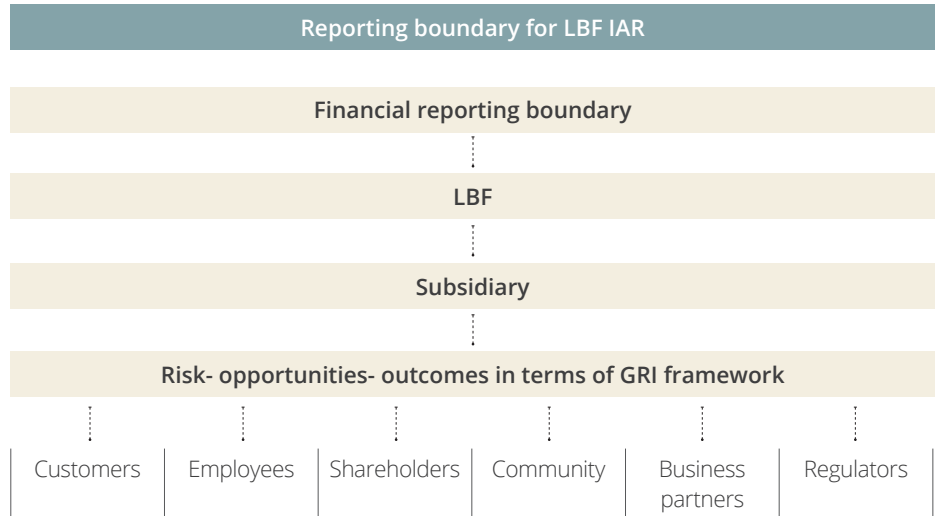

Reporting period

This report cover LBF performance as a Group, for the financial year ended 31 March 2022 (FY20). Any material events which occurred between the year-end and the report's approval on May 2022 are also included to provide a forward-looking narrative which is as complete as possible. The Integrated Annual Report (IAR) aims to provide our stakeholders with a holistic view of LBF's value creation, our strategic focus and resource allocation, corporate governance and business performance. It also outlines the Group's outlook for the financial year ending 31 March 2022 and beyond.

 2021/22 Integrated Annual Report, value creation, page 64, our strategic focus and resource allocation, page 92, corporate governance, page 225 and business performance, page 102

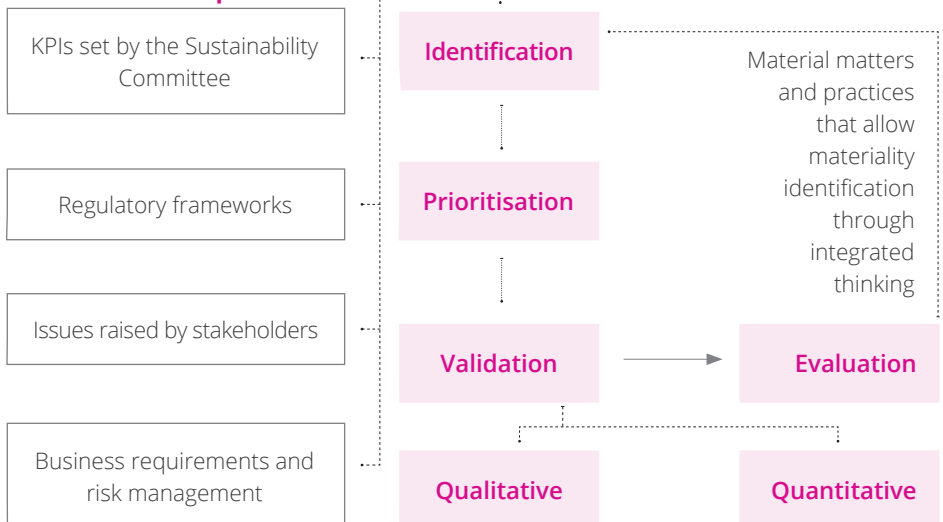

Determine the material assessment

The determination of materiality stems from multiple sources, our immediate operating context which includes the legal and regulatory compliance requirements, risk management, industry trends, globally accepted best practices and the stakeholder engagement process. On this basis, we have identified approximately six material issues that impact our ability to create value across financial, environmental and social dimensions.

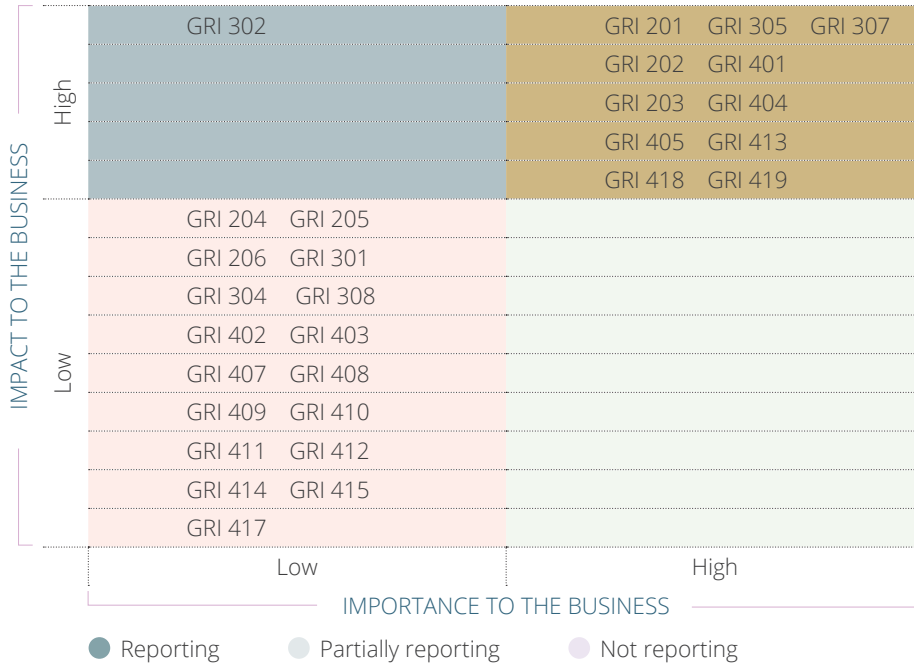

GRI 102 - 47

List of material topics

Topic Specific Disclosures

ECONOMIC

GRI 200 TOPIC SPECIFIC DISCLOSURES

Economic

GRI 201: ECONOMIC PERFORMANCE

GRI 103 -1

Management approach

Explanation of the material topic and its boundary

Economic performance refers to our ability to operate a profitable business model for the long term viability of the Company. Our objective is to provide excellent customer service to our existing customer base and future customer base. Focuses on this economic performance, which is the short to long term measure of LBF's success. The strategy also regards economic success as being inseparable from high standards in environmental and social stewardship. Within LBF, this means ensuring that our business is financially sustainable in the short and long term. Outside of LBF, this means supporting our customers' own market expansion plans and providing them with growth opportunities through the use of our products. We are also working with all stakeholders to transform the way we create value for them.

GRI 103 -2, 103 - 3

Implementation

Performance

LBF, being a responsible and sustainable Company means securing our long term economic growth positively impacting the environment and society, all while meeting stakeholders' expectations. We strive to go beyond responsible growth and benefits for our shareholders through our target of the long term success for our customers, society and the planet. This is also our approach to promoting sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all. Our value added is defined as the economic value created by the activities of our business and its employees. This value is distributed to our dividend for shareholders, employees through wages and benefits, providers of capital and governments via paid taxes.

Progress against strategy

This is completed by our approach to delivering excellence in both executions through our LBF business solutions and business operations.

 2021/22 Integrated Annual Report, strategic focus and resource allocation, page 92

 2021/22 Integrated Annual Report, financial capital, page 120

Value creation through financial capital

Strategy focus business practices are linked to how our strong partnerships enable value creation for the Company and for our key stakeholders. We have forged new partnerships with innovators, employees, business partners and with communities in which we operate, positioning ourselves as partner of choice.

 2021/22 Integrated Annual Report, value creation, page 64

Our sustainability approach

LBF completed the year with good business momentum and with the project pipeline and win rates being sustained at high levels. This good growth was achieved across all product segments and geographies.

GRI 201 - 2

Financial implications and other risks and opportunities due to climate change

We address risks associated with climate change risk through detail initiatives. We look to minimise our contribution to climate change and promote transition to a low carbon economy. We are fully committed to excellence in climate preserving action and our ambitious agenda aims at taking actions for the environment across our operations and beyond. This agenda is based on ambitious GHG emission reduction targets and our own targets have been prepared in alignment with the global effort to limit climate change. We continue to reduce the environmental impact of our activities. Our commitment in green lending practices such as encouraging our customers to purchase hybrid or zero emission vehicles. We continue to conduct carbon footprint calculation for the entire branch network. Our CSR and sustainability teams are also working on awareness programmes and green CSR activities.

Financial assistance received from government

LBF did not receive any significant financial assistance from government in financial year 2021/22.

GRI 202: MARKET PRESENCE

GRI 103 -1

Management approach

The empowerment of women contributes significantly to market presence in terms of the economic effect on local societies. Providing opportunities are essential to expanding economic growth and promoting social development. Equal treatment of women and men is not just the right thing to do – it is also good for business. We implement our policies that are consistent with promoting equal opportunities for all; the full participation of women at LBF makes sound business sense now and in the future. The Board consideration of sustainability and corporate responsibility that embraces women's participation for business process as a key goal will benefit all of us.

GRI 103 - 2, 103 - 3

Implementation

Performance

It is through compensation policies including the pay ratio of women to men that we support the participation of women and the economic growth and development of associated societies. That is a prominent topic at LBF and every year we search for gender pay equity in each of our key markets, identifying any remaining pay gaps and ensuring that these are addressed promptly. These findings are based on the industry peers' Annual Reports.

GRI 202 – 1

Ratios of standard entry level wage by gender compared to local minimum wage

Wages are managed locally with a global oversight to ensure competitive and equitable practices. In all cases, LBF pays

above minimum wages as stipulated by law or applicable collective agreements. According to legislation to be presented in Parliament of Sri Lanka, the national minimum monthly wage for all workers in any industry or service will be Rs. 10,000/- while the national minimum daily wage of a worker will be Rs. 400/-.

GRI 202 - 2

Proportion of senior management hired from the local community

All Senior managers are locally hired (within Sri Lanka).

GRI 203 : INDIRECT ECONOMIC IMPACTS

GRI 103 – 1

Management approach

The way we discuss our exposure to indirect economic impacts is to identify and promote the wider growth priorities for LBF based urban population and outlets from, and local government growth. The maintenance of a strong name in neighbourhoods in which we have a company presence tends to retain the best talent and workers. The growth of local communities is helpful of CSR aspects of fields where we work. Healthy partnerships allow them to participate in collaborative initiatives, contribute to the protection of local habitats and improve livelihoods, and all of them contribute to local communities' economic benefits.

GRI 103 -2, 103 - 3

Implementation

Performance

Neighbourhoods and community hoods in which we operate or originate are crucial to our long term sustainability. These social interests will impact communities in turn. These associates contribute greatly to our business and we dedicate ourselves

to helping them to establish a better life in return. We establish and maintain links with communities and listen to their officials to take into consideration their viewpoints and implement their input into our operations.

The near relationships we have with those who are doing transaction or activities with us, the secret to our continuing success in ensuring the long term quality of the relationship on which we depend. We collaborate with all stakeholders to enhance the quality of life through the ultimate financial services. Our primary aim is to safeguard customers, create trust and provide professional guidance and coordination in the way we make mutually beneficial changes.

In partnership with other stakeholders (shareholders, employees, service providers etc.) we create tailored action strategies based on the concerns found from their engagement survey. We promote educational, health and wellness initiatives as well as sustainable financing and development practices. We also aim to conserve the climate and natural resources in cities and promote participation in sustainable growth and creativity. We take every precaution to work peacefully both socially and economically in these areas and reduce our environmental footprint.

GRI 203 - 1

Infrastructure investments and services supported

We maintain a well managed CSR engagement agenda to strengthen our relationships with all stakeholders. In the year under review, 22 CSR projects are conducted to enhance the quality of the life.

Environment

GRI 302: ENERGY

GRI 103 – 1

Management approach

LBF, has an incredibly low direct environmental impact. However, as policies adapt and markets shift, the way we handle our business environmental impact is conditional in our partnerships with customers, business partners, other stakeholders and our growth opportunities. We are also committed to recognizing and handling even the least environmental effects that our work has.

We strive to boost our plants' eco-efficiency, including the quest for power from renewable energy sources. The threats faced by climate change are continually monitored and mitigated and adaptation and remediation are promoted in affected areas. In order to minimize GHG pollution and effects on habitats, our supply chain requires, from the raw material sources to indirect goods and service providers.

GRI 103 – 2, 103 – 3

Implementation

Performance

Motivated by both legal and organizational considerations, we continue to strengthen procedures, reduce our environmental footprint and minimize climate change impacts. Our approach is to use the electricity in productive manner.

We aim to find responses to global problems such as climate change, the depletion of energy and natural capital degradation through recognizing and integrand natural capital issues into our everyday decision making and risk management processes. We expect it to bring us closer to our goal of being the leading green Company in Sri Lanka.

We also adopted an Environmental Management System framework (EMS), which is built in accordance with globally recognized best practices and is committed to minimizing business impacts on the environment.

 2021/22 Integrated Annual Report, natural capital, page 212

GRI 302 – 1

Energy consumption within the organization

Grid electricity is our primary energy source. Total electricity consumption for the year is 30,944 GJ.

GRI 302 – 2

Energy consumption outside of the organization

Company is not consuming energy in outside locations.

GRI 302 – 3

154.72 GJ

Energy consumption per day

170.96 GJ

Energy consumption per outlet

GRI 302 – 4

Reduction of energy consumption

 2021/22 Integrated Annual Report, natural capital, page 212

GRI 305: EMISSIONS

GRI 103 – 1

Management approach

We produce scope 1, 2 and 3 emissions through direct emissions, indirect emissions related to energy use and other indirect emissions such as those in our supply chain and so affect climate change. This, in turn, directly impacts the availability of our key natural resources. Climate change causes fundamental changes in ecosystem functioning and as such, poses a significant risk to our operations. We also want to make a positive impact on the environment and society.

We work to improve the eco-efficiency of our production sites, with a focus on reducing greenhouse gas emissions and this includes seeking electricity from renewable sources. We constantly assess and mitigate the risks posed by climate change and drive adaptation and remediation in the affected areas. We also involve in our supply chain, from the raw material suppliers to indirect materials and service providers, in an effort to reduce GHG emissions and the impact on the ecosystem.

Making a positive impact on the environment and society is a central concern for our customers and their consumers and it is key to improving our own performance. In doing so, we must also anticipate and influence change. Our approach to responsible innovation considers the potential impact of our processes and products on the environment and also where we can have a positive impact on society. We engage with customers to develop new products and technologies that are more sustainable.

GRI 103 – 2, 103 – 3

Implementation

Performance

We are committed to reducing absolute direct and indirect (scope 1 and 2) emissions by 40% by 2030 compared to 2020 levels and aim to reduce indirect (scope 3) emissions those produced by our entire value chain by minimal over the same period.

Scope 1 emissions are defined as those generated by LBF's fossil fuel consumption and fire extinguishers. Scope 2 emissions come from the emissions associated with electricity consumption. Scope 3 emissions are sometimes difficult to assign to a specific operation, therefore, the reporting method for different sources may vary.

Transition to a low carbon economy, we are also committed to becoming a climate positive business before 2050 based on scope 1, 2 and 3 emissions according to the GHG protocol. We have an interim goal of achieving climate positive operations in terms of scope 1 and 2 emissions before 2040.

Converting our entire electricity supply to fully renewable sources by 2035 is a critical element of this approach. We are at the same time leading significant energy consumption reduction projects across operations and making improvements through investment and effort in energy saving workshops, eco efficiency plans that cover a range of topics including a switch to renewable energy as well as targeted projects, all of which contribute to reduced emissions.

We are targeting a decrease in scope 3 emissions through a joint effort with employees to reduce the carbon footprint of purchased goods and services and associated transport. We are members of the Climate SI, which will enable us to identify ways to reduce the carbon consumption.

 2021/22 Integrated Annual Report, natural capital, page 212

Reduction of GHG emissions

This emission report details the quantification of Green House Gas (GHG) emissions for L B Finance PLC for the financial year 2020/2021 (1st April 2020 – 31st March 2021) and provides recommendations to reduce GHG emissions. The boundary of this assessment is the Head Office (located at No. 275/75, Pro. Stanley Wijesundara Mawatha, Colombo 07.), Corporate Office (located at No. 20, Dharmapala Mawatha, Colombo 03), and 181 branches in Sri Lanka. This study quantifies and reports the organizational level GHG emissions based on data received from L B Finance PLC in accordance with ISO 14064-1:2018 and United Nations Intergovernmental Panel on Climate Change (IPCC) Fifth Assessment Report (AR5). All GHG emissions were reported as tonnes of CO2 equivalent (tCO2e).

 2021/22 Integrated Annual Report, natural capital, page 212

GRI 305-6, 305-7

Emissions of ozone-depleting substances (ODS)

Nitrogen oxides (NOX), sulfur oxides (SOX) and other significant air emissions

Emissions of ozone-depleting substances (ODS) our assessment for the year under review, did not reveal any significant air emissions or emission of ozone depleting substances, pollutants and other hazardous compounds arising from LBF's operations. As a result, no detailed measurement of emissions was carried out for LBF, except for what was computed under the carbon footprint calculation process.

GRI 307: ENVIRONMENTAL COMPLIANCE

GRI 103 – 1

Management approach

Environment compliance pose a challenge for the sustainable, rentable growth and socio-economic stability of many environmental resources. Our Company not depends on a wide range of natural resources to produce its flavour and scent items – this has no direct implications for our business. In order for the sustainability of a complex, living world, we need a balance of security, environmental management and regeneration where possible. We ought to help protect natural capital for our Company's long term future.

Environmental enforcement and recovery are the key international instrument which provides a general mechanism for saving and using resources sustainably and for an equal and equitable share of its benefits.

GRI 103 - 2, 103 - 3

Implementation

Performance

We also promote environmental protection in collaboration with institutes of local government which work to preserve vulnerable ecosystems and have formed multiple partnerships to protect local landscapes, genetic resources and environment compliance with local authorities.

Following the Company EMS, we analyzed EMS procedures with respect to internal procedures, in order to achieve a coherent approach both to the sourcing dimensions of the upstream supply and a systematic approach to provide our consumers with the right details. Many of our initiatives follow the driving principles of the SDGs and the organizational climate pledges from the viewpoint of creativity. The future effect of environmental regulation in the country is continuously assessed. We have environmental protection programmes in island-wide, which all tie into our environmental commitment strategy, which is focused on best practices and has strengthened dramatically.

GRI 401: EMPLOYMENT

GRI 103 -1

Management approach

With more than 3,500 workers, LBF is the largest employer in the financial sector. These visionary artistic practitioners are central to our growth. These are our workers who play a wide spectrum of positions and help develop the initial developments of meaning and community in the business.

Via our discussion on talent acquisition, LBF discusses the material topics. It is important to hire, grow, involve and maintain a diverse workforce that addresses potential company demands to boost employee satisfaction, cut costs and increase revenues.

The recruitment and development of employees is a vital factor in achieving our organization and sustainability targets. People who enjoy our work and who are committed to building a prosperous world contribute greatly to the growth of our companies. We concentrate on workforce growth to maximize capabilities and competitiveness, continuously adjust expertise to demands and provide our workers with the best available opportunities.

GRI 103 - 2, 103 - 3

Implementation

Performance

We are working with our people and their strengths. The long tradition of the business with innovation and great customer service continues with its enthusiasm. We represent the communities and cultures in which we operate and offer people of all ages, genders and experience opportunities. We agree that diversity and inclusivity gives our workers greater power and equality and aspire to lead to complete, dedicated jobs and good employment for everyone. We ensure that equal pay, employees' rights, decent working and regulatory ties and that our young labour force continues to improve its skills.

The effect is that workers have an encouraging feeling and will understand their goals throughout their professions. We promote the constructive growth of talent and provide tailored technological and functional assistance. We promote the creation of a diverse population through the production of capabilities for successful leadership by fostering a pool of business expertise and potential leaders and helping to bring local talent and industry professionals together to encourage growth in all markets.

At LBF, the leadership route is open and we are committed to equal opportunities to any inspired, creative and skilled citizen. We have a strategy to attract, hire and encourage individuals exclusively on the basis of expertise and knowledge required to work regardless of race, age, gender, national origin or some other category that does not matter. Finally, equitable and reasonable pay is necessary if best talent in the industry is to be drawn, inspired and retained. Our remuneration strategy is focused on success compensation, global competition, internal uniformity and equity.

GRI 404: TRAINING AND EDUCATION

GRI 103 - 1

Management approach

LBF tackles recruitment and education through its material theme talent management, recruiting, designing, engaging, deploying and maintaining a balanced workforce that faces potential demands is important to our sector.

We concentrate on workforce growth with a view to developing capabilities and effectiveness, continually adapting skills to needs and giving our employees the best opportunity. It helps to boost the retention of workers, lower expenses and raise our profitability.

We provide an exciting and inspiring atmosphere for workers to achieve their career ambitions. This includes strategic workforce growth, delivering tailored technological and logistical assistance, and working to enhance leadership skills. We also underpin the development of a strong workforce by cultivating a network of business professionals and potential leaders to build expertise for sustainable success.

GRI 103 - 2, 103 - 3

Implementation

Performance

Talent growth includes improving leadership skills and ensuring that we have candidates who will fulfill tomorrow's needs. It also encourages us to attract and inspire skilled candidates. Our internal activities concentrate on proactive talent growth and the development of a well-balanced workforce. Both services deliver engaging and inspiring learning opportunities where staff are motivated to discover and encounter new ways of

thinking and working. This also includes integrating multimedia technologies, self reflection, instruction, in house sessions and virtual/digital collaboration in the COVID-19 pandemic, creating a supportive space to implement and checking what workers understand. There is a heavy emphasis on bringing what has been studied back to the operating world. Our drive to grow and involve our skilled professionals is further expressed in initiatives such as our LBF induction programme, a program that enables new workers to learn fundamental knowledge about our organization and its rich history, our industry and our DNA. We also have a series of personalized preparation programmes called sales management and motivational sessions, an annual success schedule that involves talent assessments and job conversations, all of which are part of a philosophy of constant development, interest and feedback.

Managing talent helps us to recruit and maintain the best and brightest. We also plan to recruit local expertise and business leaders to promote success in all regions. We promote diversity in our enterprise and hire to create a diverse and multicultural workforce.

GRI 103 - 2, 103 - 3

Implementation

Performance

We support diversity in our enterprise and are completely committed to inclusiveness. We evaluate and analyze the statistics of our balanced workforce, in particular gender and ethnicity, and monitor success in this respect, including the proportion of women and high growth business in leadership roles. Our diversity position outlines our commitment to maintain a representative workforce that represents the diverse cultures in which we operate. Two of our current priorities note that by 2030, 30% of our senior leaders will be women and 35% from high growth markets.

Our commitment to improving balance ensures that a healthy match of gender strengthens our culture and is necessary to meet our market objectives. We are committed to providing and contributing to a work environment that is focused on shared respect for people and free from abuse.

The road towards leadership is accessible and egalitarian to any inspired, skilled and eligible person. Our standards of conduct state that our practices are focused entirely on credentials and expertise required to work regardless of ethnicity, age, gender, national origins or any other category that is not appropriate.

GRI 405: DIVERSITY AND EQUAL OPPORTUNITY

GRI 103 - 1

Management approach

Diversity is essential to helping us navigate our dynamic working environment and to represent our customers in the best possible way. Equal rewards are required to inspire executives to make better business choices. Diversity and equal rights was discussed through the content material diversity and inclusion, women's equality and talent management.

Diversity and inclusion was addressed by searching for a balanced workforce that represents the communities in which we function. This includes attempts to eradicate any bigotry and to allow individuals of all backgrounds the opportunity to succeed. Fair justice for women and men is not only the right thing to do – it is also beneficial for company. The full inclusion of women in LBF makes a good business sense and promoting women's equality as a core target would help all of us.

GRI 413: LOCAL COMMUNITIES

GRI 103 - 1

Management approach

Our long term sustainability includes cities and districts where we work. Our enterprise can impact societies and our actions can affect those local stakeholders. We build and maintain active connections with communities and listen to community leaders before incorporating their input into our sustainability activities.

It is important for our company to understand and promote the larger growth priorities of local communities. Holding a strong name in societies in which we have development or trade involvement adds to the company's attraction to the best talent and staff. We will help to ensure the long term availability of these products in places where we supply raw materials by encouraging the growth of the local community. Fostering good relations helps them to collaborate together in order to preserve local habitats and livelihoods. We partner with local groups to promote these priorities in initiatives and causes.

GRI 103 - 2, 103 - 3

Implementation

Process

We make an important contribution to our sector for the suppliers of natural raw materials. We are committed, in exchange, to helping them in their growth. For more than a decade, we have assisted local producers across a series of social and environmental programmes. In order to help create safer world for people and

GRI 400 TOPIC SPECIFIC DISCLOSURES

Social

their climate, we have partnered with universities since 2019/20. We collaborate with students on these cooperative ventures to identify and then work collaboratively with local needs. Moreover, in six unique regions, the LBF has its own initiatives; Environment 1st, Health 1st, Safety 1st, Future 1st, Heritage 1st, Help 1st.

LBF's CSR collaborate closely with the services offered for these projects by

LBF and depends on them. We also donate to charity organisations. We promote programmes in the fields of education, health and nutrition as well as good practice in protection processes in collaboration with manufacturers, vendors and other organisations. We also help people to preserve their natural resources and climate.

Any care is taken to work healthy both socially and economically in these

societies while reducing our effect on the environment. Therefore, we are in the view of that the everybody should make a difference to the well-being on the societies in which we live and operate. Our green teams, who are involved on most of our pages, provide the ability to make those contributions. Members of these teams engage both in voluntary and internal environmental programmes in local communities.

Operations with significant actual and potential negative impacts on local communities

As a financial services provider, there is no significant actual and potential negative impacts on local communities from the business operations.

GRI 418: CUSTOMER PRIVACY

GRI 103 - 1

Management approach

We need some personal and sometimes proprietary information from our customers in order to offer our value proposition. This covers details we collect from customer applications/account form(s), KYC forms and reports from third parties such as the Central Bank and other regulated authorities about the customer's transaction history with the Company. We agree that the security

and safety of customer information is one of our core obligations with vast amounts of such information gathered within day-to-day business. We agree that the ability of customers to share their personal information is a vote of faith in the Company and that we are always committed to protecting customers' privacy rights.

GRI 103 - 2, 103 - 3

Implementation

Performance

As a guideline, unless otherwise authorized by statute, the LBF shall not report customer details to third parties. Both customer personal information will be stored in the context of our operating and data management processes which are managed in a security framework to preclude third-party access to information at any point during their banking relationship with us. In order only workers who have to know this information have

GRI 419: SOCIOECONOMIC COMPLIANCE

GRI 103 -1

Management approach

We deem it our obligation to do more in order to face the obstacles that obstruct the success of our people as a leading financial institution in Sri Lanka. As a responsible corporate citizen, our Mission is to respond in a way that will cause positive social change for the long term

GRI 400 TOPIC SPECIFIC DISCLOSURES

Social

to Sri Lanka's evolving economic-social needs. We believe that we will build lasting progress in the betterment of society by striving to help people evolve and succeed.

Our business targets are associated with socio-economic problems that are perceived to be national priorities. This is also driven by the Sustainable Development Goals of the United Nations (SDGs). We seek to implement the four main stones of sustainability through a socially conscious CSR paradigm, which seeks to achieve a structural shift in grassroots levels.

GRI 103 - 2, 103 - 3

Implementation

Performance

A CSR expenditure that is used to cover the expenses of a group initiative will earn significance amount of the annual profits taxed by LBF. The overall management of the fund shall be included in each pillar of CSR/Sustainability, which is the responsibility of the Corp. Sustainability Committee headed by the Executive Director, with appointed appointees. The Corporate CSR members' monitors and performs the appraisal, resource utilization, execution and successfully performance of the projects under each CSR pillar.

INDEPENDENT ASSURANCE REPORT TO THE BOARD OF DIRECTORS OF LB FINANCE PLC ON THE SUSTAINABILITY REPORTING CRITERIA PRESENTED IN THE INTEGRATED ANNUAL REPORT- 2021/22

Scope

We have been engaged by the management of LB Finance PLC (“the Company”) to perform an independent assurance engagement, as defined by the Sri Lankan Standard on Assurance Engagements, on the sustainability reporting criteria presented in the Integrated Annual Report for the year ended 31 March 2022 (the “Report”).

- » Reasonable assurance on the information on financial performance as specified on page 18 of the Report.
- » Limited assurance on other information presented in the Report, prepared in accordance with the GRI Standards: Comprehensive option.

Criteria applied by LB Finance PLC

The sustainability reporting criteria presented in the Report has been prepared in accordance with The Global Reporting Initiative’s (GRI) Sustainability Reporting Guidelines, publicly available at GRI’s global website www.globalreporting.org.

This Report has been prepared in accordance with the GRI Standards: Comprehensive option (the “criteria”).

LB Finance PLC’s responsibilities

LB Finance PLC’s management is responsible for selecting the criteria, and for presenting the Report in accordance with the said criteria, in all material respects. This responsibility includes

establishing and maintaining internal controls, maintaining adequate records and making estimates that are relevant to support the sustainability reporting process of the Report, such that it is free from material misstatement, whether due to fraud or error.

Ernst & Young’s responsibilities

Our responsibility is to express a conclusion on the presentation of the Report in accordance with the GRI Standards: Comprehensive option based on the evidence we have obtained.

We conducted our engagement in accordance with the Sri Lanka Standard on Assurance Engagements

SLSAE 3000: Assurance Engagements other than Audits or Reviews of Historical Financial Information (SLSAE 3000) issued by the Institute of Chartered Accountants of Sri Lanka and the terms of reference for this engagement as agreed with LB Finance PLC in the engagement letter dated 27 February 2022.

The standards require that we plan and perform our engagement to express a conclusion on whether we are aware of any material modifications that need to be made to the Report in order for it to be in accordance with the criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our independent assurance conclusion.

Our Independence and Quality Control

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Professional Accountants issued by the Institute of Chartered Accountants of Sri Lanka and have the required competencies and experience to conduct this assurance engagement.

EY also applies Sri Lanka Standard on Quality Control (SLSQC 1), Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Description of procedures performed

We performed our procedures to provide an independent assurance engagement in accordance with SLSAE 3000.

Procedures performed in the reasonable assurance engagement depend on our judgement, including the assessment of the risks of material misstatement whether due to fraud or error. In making those risk assessments, we have considered internal control relevant to the preparation and presentation of the reasonable assurance Indicators in order to design the assurance procedures that are appropriate in the circumstances. Our procedures also included assessing the appropriateness of the reasonable assurance indicators, the suitability of the criteria in preparing and presenting the reasonable assurance indicators within the Report and obtaining

an understanding of the compilation of the financial information to the sources from which it was obtained.

Procedures performed in the limited assurance engagement consisted of making inquiries, primarily of persons responsible for preparing the Report and related information and applying analytical and other appropriate procedures. These procedures vary in nature and timing from and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

We also performed the below procedures as we considered necessary in the circumstances:

- » Perform a comparison of the content of the Report against the Global Reporting Initiative (GRI) - GRI Standards guideline.

- » Interviewing relevant organization's personnel to understand the process for collection, analysis, aggregation and presentation of data.
- » Review and validation of the information contained in the Report.
- » Check the calculations performed by the organization on a sample basis through recalculation.
- » Advice, make recommendations and suggestions on the Sustainability Reporting indicators to improve the presentation standard.
- » Independently review the content of the Report and request changes if required.
- » Express an independent assurance conclusion on the performance indicators presented in the Sustainability Reporting criteria.

Emphasis of matter

Social, natural and intellectual capital management data/information are subjected to inherent limitations given their nature and the methods used for determining, calculating and estimating such data.

We also do not provide any assurance on the assumptions and achievability of prospective information presented in the Report.

Restricted use

This report is intended solely for the information and use of LB Finance PLC and is not intended to be and should not be used by anyone other than the specified party.

Conclusion

Based on our procedures and the evidence obtained, we conclude that:

- » The information on financial performance as specified on page 18 of the Report is properly derived from the audited financial statements of the Company for the year ended 31 March 2022.
- » Nothing has come to our attention that causes us to believe that other information presented in the Report are not fairly presented, in all material respects, in accordance with the Company's sustainability practices and policies some of which are derived from the GRI Standards: Comprehensive option.
